

cable/internet installation authorization

Date: _____

Rental Address: _____

This letter provides authorization from our company for your company to install the necessary equipment to provide cable/internet service as requested by our tenant.

This authorization includes any additional cable jacks and repair to any lines needed. It also allows for drilling from the exterior to the interior to install new jacks provided that any interior and/or exterior damage is repaired (holes cleanly caulked, etc.). Any additional charges will be charged directly to the tenant. No cables are permitted to be run on the surface of any wall inside the unit.

For Satellite Dishes: No equipment is allowed to be affixed to any portion of the building itself; a dish can however, be installed on a fence or railing. If there is no place to install on a fence or railing, a tripod or clamp must be used. Any damage caused to any surface (including fence/railing) by the installation of the dish will be billed to tenant upon removal.

If you have any questions for our office or would like any further information, please feel free to contact us at 503-719-6089.

Best regards,

Dwell Management
